

# CASA MARIN

Casa Marin is our premium line of fine wines. Considered among the best cool climate wines in the country and in the world with numerous international awards.

Casa Marin is an exclusive winery located in the town of Lo Abarca, only 4kms from the Pacific Ocean. This microclimate has an average temperature of 14°C in the growing season, and an annual rainfall of 200mm during winter.

## ROSÉ

MIRAMAR NORTE 2020

The vines of Miramar Norte are 15 years old. They are exposed to a coastal climate, with cold mornings and cloudy days. However, Miramar Norte is the warmest block in the vineyard, sitting on the warmer slopes facing north. This is a rosé made with Syrah of extremely cold weather which gives the wine a beautiful natural high acidity. This is Chile's first premium Rosé. Its style is fresh, exotic, unique and seductive.

## VINIFICATION

Grapes were harvested manually on April 13<sup>th</sup> and primarily based on the berry tasting of Felipe and Marilu. Upon arrival at the winery they were selected and vinified by the "Siagnée method". 100% of the grapes were whole bunch pressed. Only the free-run juice was used for this wine.

The juice is fermented at low temperature using white wine yeast and encouraging the aromatic profile of the wine. No additives or corrections were made.
